GREEN MECHANICAL SOLUTIONS FOR A HEALTHY ENVIRONMENT

Are the big HVAC manufacturers pushing you to buy expensive, brand new, off the shelf, gas-guzzling Heating and Air conditioning equipment?

There are some new solutions available to you that may help you generate LEED points: Recycled and refurbished HVAC equipment of almost any size, brand, and type fully warranted by our company – at a fraction of the cost of new. You may specify your preferred brand name, and whether you would like refurbished or new equipment.

We can even customize this refurbished or new equipment to meet your needs, specializing in 'Green' options.

Our LEED certified engineers can help you benefit the environment with solutions like:

- Recycled material content (0-100%)
- Systems without refrigerant
- Quiet equipment
- Free heat generation
- Free hot water
- Energy recovery
- Solar energy generation
- High efficiency
- Reduced water usage
- Environmental refrigerants
- Low energy desiccant systems
- Temperature and humidity management
- Special coatings
- Thermal storage (hot and cold)

FISEN CORPORATION

Welcome

Thank you for visiting Fisen Corporation's website, home of **Future Energy Technology**. At Fisen, we foster innovation to supply you with cutting edge heating and cooling solutions, from controls through energy recovery. Our company was founded by the leading sales and design engineer team that garnered its expertise creating the custom products line for a world-leading HVAC manufacturer. We've moved on to bring out-of-the-box energy technology to institutional and commercial applications through a variety of patented and custom products.

We're committed to global greening, unique solutions, excellence in design and fiscal stewardship. Now you can put our team to work creating custom solutions for your enterprise.

Please visit our [Capabilities](#) section for an overview of our core strengths; our [Solutions](#) section for case studies; our [Green](#) section for ideas on how to leverage your environmental efficiency while maximizing your return-on-investment, and our [Custom](#) page for examples of our leading edge custom work and re-manufactured products.

Thank you for visiting. We look forward to putting our unique solutions to work with your enterprise.
